

EXP NO 5: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR LIBRARY BOOK RESERVATION SYSTEM FOR SIMATS LIBRARY USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS

DATE: 01.08.2026

AIM:

To Create a simple cloud software application for Library book reservation system for SIMATS library using any Cloud Service Provider to demonstrate SaaS

PROCEDURE:

step1: Go to zoho.com.

step 2: Log into the zoho.com.

step 3: Select one application step.

step4: Enter application name as library book reservation system.

step 5: Created new application as library book reservation system.

step 6: Select one form

step 7: The software has been created.

IMPLEMENTATION:

The screenshot displays the Zoho Creator web interface for a 'Library Book Reservation System'. The main workspace shows a form titled 'Book Reservation' with the following fields:

- StudentName**: Split into 'First Name' and 'Last Name' text input fields.
- StudentID**: A text input field containing '#####'.
- Department**: A dropdown menu with '-Select-'.
- BookTitle**: A dropdown menu with '-Select-'.
- IssueDate**: A date input field with the format 'dd-MMM-yyyy'.
- ReturnDate**: A date input field with the format 'dd-MMM-yyyy'.
- ReservationStatus**: A dropdown menu with '-Select-'.

A blue 'Submit' button is located at the bottom of the form. The left sidebar contains a menu with 'Book Reservation' and 'Book Reservation Report'. The right sidebar shows 'Form Customization - Web' options for 'Label placement'. The top navigation bar includes 'Design', 'Workflow', 'Settings', 'Upgrade', and 'Access Development Live'. The bottom status bar indicates 'Trial expires in 14 days' and provides links for 'Upgrade', 'Get started faster!', and 'Help'.

The screenshot shows a web application interface for a 'Library Book Reservation System'. On the left is a dark sidebar with navigation options: 'Book Reservation' (selected), 'Book Reservation', and 'Book Reservation Report'. The main content area is titled 'Book Reservation Report' and contains a table with the following data:

StudentName	StudentID	Department	BookTitle	IssueDate	ReturnDate	ReservationStatus
Abi R	192371024	IT	Cloud Computing	20-Aug-2026	05-Sep-2026	Reserved
Anu R	192371026	CSE	Data Structures	01-Aug-2026	21-Aug-2026	Issued

At the bottom of the table, it says 'Showing 2 of 2'.

```
// Student ID
```

```
if(input.StudentID == null)
{
    alert "Please enter Student ID.";
}
```

```
// Department Validation
```

```
if(input.Department == null)
{
    alert "Please select Department.";
}
```

```
// Book Validation
```

```
if(input.BookTitle == null)
{
    alert "Please select Book.";
}
```

```
// Issue Date Validation
if(input.IssueDate == null)
{
    alert "Please select Issue Date.";
}

// Return Date Validation
if(input.ReturnDate == null)
{
    alert "Please select Return Date.";
}

// Reservation Status Validation

if(input.ReservationStatus == null)
{
    alert "Please select Reservation Status.";
}

// Success Message

info "Book Reserved Successfully.";
```

Result:

Thus, a simple cloud-based **Library Book Reservation System** for **SIMATS Library** was successfully developed using **Zoho Creator**. The application allows students to reserve library books online, stores reservation details securely in the cloud, and demonstrates the **Software as a Service (SaaS)** model.
