

EXP NO 4: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR CAR BOOKING RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

DATE:01.08.2026

AIM:

To Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

step1: Go to zoho.com.

step 2: Log into the zoho.com.

step 3: Select one application step.

step4: Enter application name as Car Booking Reservation System.

step 5: Created new application as Car Booking Reservation System.

step 6: Select one form

step 7: The software has been created.

IMPLEMENTATION:

The screenshot displays the Zoho Creator interface for a 'Car Booking Reservation System' application. The top navigation bar shows the application name and a 'Done' button. The left sidebar contains a 'Basic Fields' panel with various field types: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, and Multi Select. The main workspace shows a form with the following fields: 'CustomerName' (with a user icon), 'PaymentStatus', 'PickupLocation', 'BookingDate', 'CarType', and 'NumberOfDays'. The right sidebar shows the 'Field Properties' panel for the 'CustomerName' field, with settings for Field name, Field link name, Validation (Mandatory), Display Fields (Prefix, First Name, Last Name, Suffix), Data Privacy (Contains personal data), and Data Security.

// Customer ID Validation

```
if(input.CustomerID == null)
{
    alert "Please enter Customer ID.";
}
```

```
// Car Type Validation
```

```
if(input.CarType == null)
{
    alert "Please select Car Type.";
}
```

```
// Pickup Location Validation
```

```
if(input.PickupLocation == null)
{
    alert "Please select Pickup Location.";
}
```

```
// Booking Date Validation
```

```
if(input.BookingDate == null)
{
    alert "Please select Booking Date.";
}
```

```
// Number of Days Validation
```

```
if(input.NumberOfDays == null)
{
    alert "Please enter Number of Days.";
}
```

```
// Number of Days Check
```

```
if(input.NumberOfDays != null && input.NumberOfDays <= 0)
{
    alert "Number of Days must be greater than zero.";
}
```

```
// Payment Status Validation
```

```
if(input.PaymentStatus == null)
{
    alert "Please select Payment Status.";
}
```

```
// Success Message
```

```
info "Car Booking Reservation Submitted Successfully.";
```

Result:

Thus, a simple cloud-based **Car Booking Reservation System** was successfully developed using **Zoho Creator**. The application enables users to reserve cars online, securely stores booking information in the cloud, and demonstrates the **Software as a Service (SaaS)** model.
