

EXP NO 2: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR FLIGHT RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

DATE: 30.07.2026

AIM:

To create a simple cloud software application for flight reservation system using any cloud service provider to demonstrate saas.

PROCEDURE:

- step1: Go to zoho.com.
- step 2: Log into the zoho.com.
- step 3: Select one application step.
- step4: Enter application name as flight reservation system.
- step 5: Created new application flight reservation system.
- step 6: Select one form
- step 7: The software has been created.

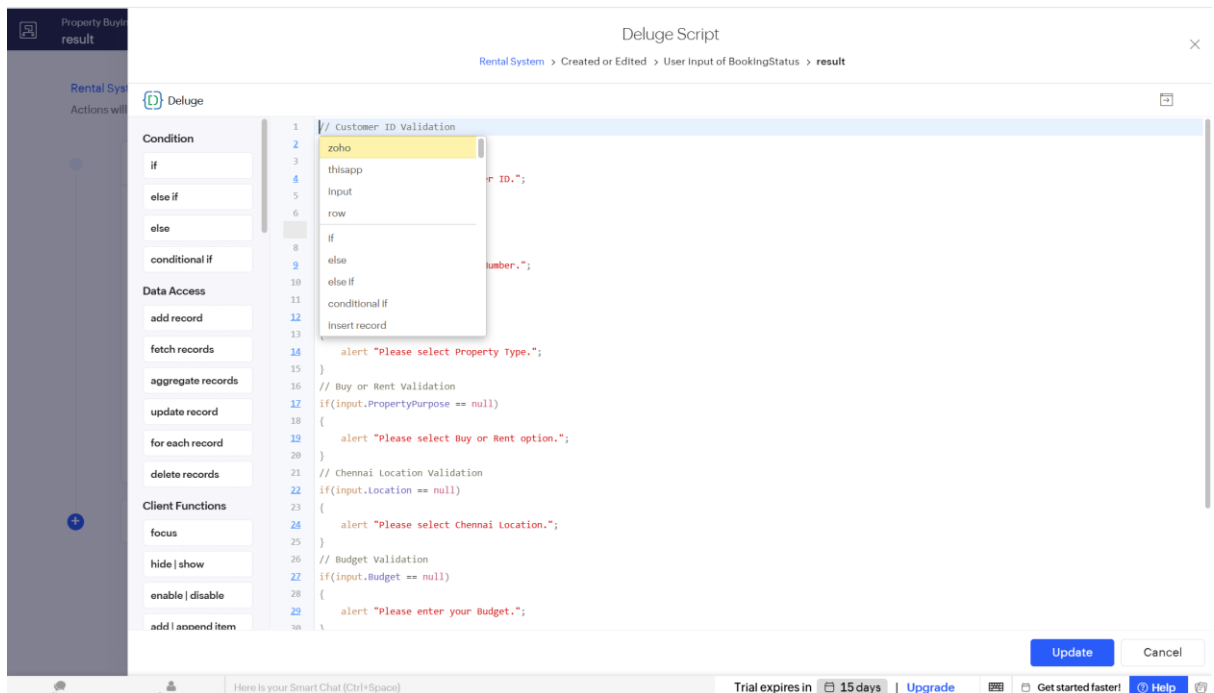

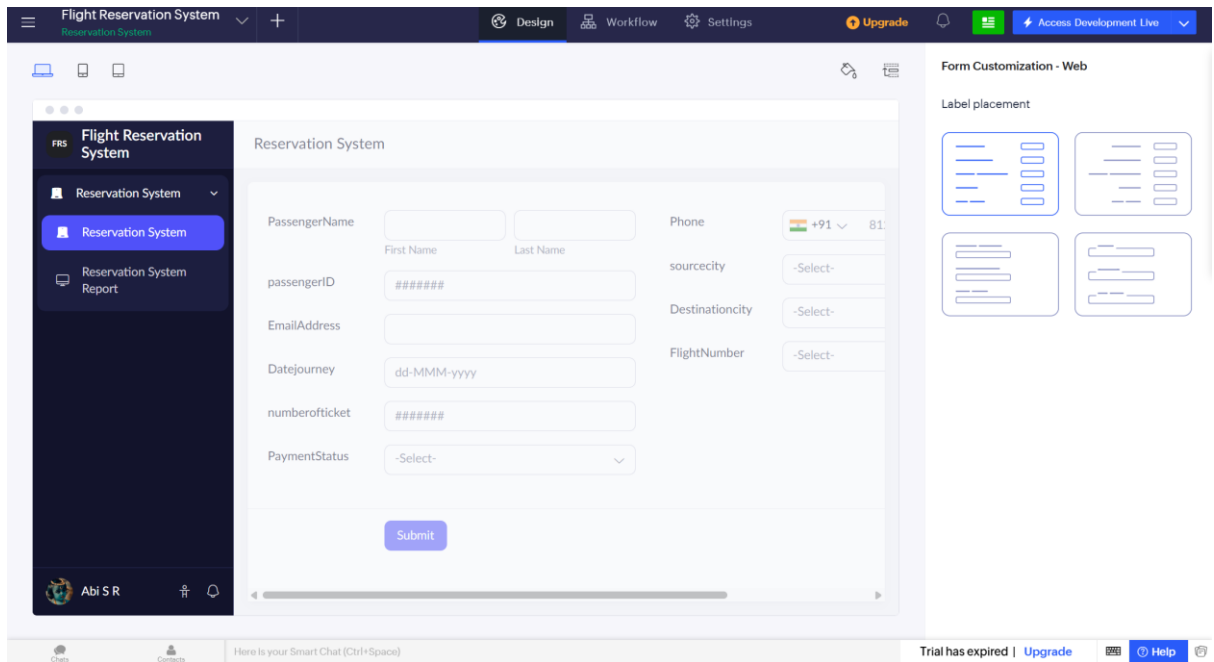

The screenshot displays the Zoho Creator application builder interface for a flight reservation system. The browser address bar shows the URL: `creator.zoho.in/appbuilder/abinayasr20/flight-reservation-system/formbuilder/Reservation_System/edit`. The application is titled "Flight Reservation System" and "Reservation System".

Basic Fields: A sidebar on the left lists various field types: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, and a custom field icon.

Field Properties: A sidebar on the right shows the configuration for the selected "PassengerName" field. It includes:

- Field name:** PassengerName
- Field link name:** PassengerName
- Validation:** ☐ Mandatory
- Display Fields:** ☐ Prefix, ☒ First Name, ☒ Last Name, ☐ Suffix
- Data Privacy:** ☒ Contains personal data (PII)

The main workspace shows the form layout with fields: PassengerName, Phone, passengerID, sourcecity, EmailAddress, Destinationcity, Datejourney, FlightNumber, numerofticket, and PaymentStatus. A "Done" button is located in the top right corner of the interface.

PassengerName	PassengerID	SourceCity	DestinationCity	FlightNumber	JourneyDate	NumberofTickets
jaya harini j	192371034	Bangalore	Mumbai	AI101	02-Aug-2026	1
Abi R	192371024	Chennai	Delhi	AI101	06-Aug-2026	2

Showing 2 of 2

```
// Passenger Name Validation
```

```
if(input.PassengerName.first_name == "")
{
    alert "Please enter Passenger Name.";
    cancel submit;
}
```

```
// Passenger ID Validation
```

```
if(input.PassengerID == null)
{
    alert "Please enter Passenger ID.";
    cancel submit;
}
```

```
// Email Validation
```

```
if(input.PassengerEmail == "")
{
    alert "Please enter Email Address.";
    cancel submit;
}
```

// Phone Number Validation

```
if(input.PassengerPhone == "")
{
    alert "Please enter Mobile Number.";
    cancel submit;
}
```

// Source City Validation

```
if(input.SourceCity == null)
{
    alert "Please select Source City.";
    cancel submit;
}
```

// Destination City Validation

```
if(input.DestinationCity == null)
{
    alert "Please select Destination City.";
    cancel submit;
}
```

```
// Prevent Same Source and Destination
```

```
if(input.SourceCity == input.DestinationCity)
{
    alert "Source and Destination cannot be the same.";
    cancel submit;
}
```

```
// Flight Number Validation
```

```
if(input.FlightNumber == null)
{
    alert "Please select Flight Number.";
    cancel submit;
}
```

```
// Journey Date Validation
```

```
if(input.JourneyDate == null)
{
    alert "Please select Journey Date.";
    cancel submit;
}
```

```
// Class Type Validation
```

```
if(input.ClassType == null)
{
    alert "Please select Class Type.";
}
```

```
        cancel submit;
    }

// Number of Tickets Validation

if(input.NumberofTickets == null)
{
    alert "Please enter Number of Tickets.";
    cancel submit;
}

// Payment Status Validation

if(input.PaymentStatus == null)
{
    alert "Please select Payment Status.";
    cancel submit;
}

// Booking Confirmation Message

info "Flight Ticket Booked Successfully.";
```

Result:

Thus, a simple cloud-based **Flight Reservation System** was successfully developed using **Zoho Creator**. The application enables users to reserve flight tickets online, stores reservation details in the cloud, and demonstrates the **Software as a Service (SaaS)** model.
